

Data Entry Goals: **One-on-One Model**

Families

- All Family Information forms are entered into DAISY within 30 days from intake date
- At least one participating adult is added to the Family Information form

Child Measures (CBT)

- Pre-measure is entered by 6 completed visits
- Mid-measure is entered by 46 completed visits
- Post-measure is entered by 90 completed visits
- All measures are entered into DAISY within 30 days from administration date

Developmental Screener (ASQ-3 & ASQ:SE-2)

- First questionnaire is entered by 6 completed visits
- Based on child's age, each questionnaire is completed at appropriate month intervals (16 to 60 months)
- All questionnaires are entered into DAISY within 30 days from administration date

Parent Interaction Measures (PACT & PICCOLO)

- Pre-measure is entered by 6 completed visits
- Mid-measure is entered by 46 completed visits
- Post-measure is entered by 90 completed visits
- All measures are entered into DAISY within 30 days from administration date

Visits

- For each enrolled family, 46 visits are completed in the scheduler by 30-36 weeks
- By the end of the program (60-72 weeks), each family has 92 visits completed in the scheduler
- All visits are entered into DAISY within 30 days from visit date

Referrals

- For each referral, follow up date is entered in referral information within 3 weeks
- Initial referral entries are entered into DAISY within 30 days from referral date

Staff

- For each active staff, demographic data are entered within 2 weeks from when their account was created
